T&S Brass 74
Watts
- Automatic Control Valves (ACV) 77
- Backflow Preventers....78
- Carriers....81
- Drains & Interceptors....82
- Mixing Valves 85
- PRV 86
- Strainers 88
- Trench Drains....90
- Valves....91

MEP Product Finder & Specification Guide

This guide helps consulting engineers, designers, and contractors quickly identify the right products for many of the products represented by our company. It will assist in providing the product and reference the information needed to include it in project documents. Use it as a fast "product finder" by discipline and application, then follow the embedded submittal and specification prompts to finalize your selections.

Important: This guide reflects the manufacturer's **base (standard) product offering** unless otherwise noted. Any **optional features, accessories, special materials/finishes, controls, ratings, certifications, or performance enhancements** required for the project must be **explicitly called out** in the schedule, notes, and/or specification.

Who this guide is for: Mechanical (HVAC/hydronic), Plumbing, and Fire Protection teams involved in design and specification of products.

How to use this guide

1. **Type of product:** Go to the section for the manufacturer to see the most common product selections.
2. **Narrow by application:** Within each section, find the product application that matches your design intent (e.g., equipment connection, distribution piping, supports/attachments, access/maintenance, condensate management, metering/monitoring).
3. **Pull spec-ready information:** Use the provided link to obtain the product information, specification, BIM and/or CAD drawings, and sizing to draft your product selection narrative and schedule entries.
4. **Request help when needed:** For alternatives, substitutions, or unusual conditions, contact info@harrywarren.com. We can provide cut sheets, typical details, and specification language aligned to your office standards.
